

Lion

Let's go on Safari

Materials you will need:

- 2 white paper plates
- Yellow, white, brown, black paints or markers
- Black marking pen
- Tacky glue
- Scissors
- 2 - 1" google eyes

Instructions to make your lion:

1. First cut one of the paper plates in half.

2. Paint the half plate yellow and the center of the full plate yellow.

3. Now get out your brown paint and paint the edges of the full plate, then add some ears. On the half plate add some feet.

4. Trace around the feet with a black marker and then add toes ☺

5. Make cuts around the large plate on the brown painted area like this. Go all the way around to create your lion's mane.

6. Now for the fun part.
 - a. Glue on two google eyes, if you don't have eyes you can draw them on.
 - b. Paint the inside of the ears yellow.
 - c. Paint the white part of the lion's nose. Let the white part dry all the way.
 - d. Get your black marker and color a nose on top of the white.
 - e. With your marker add some dots on the white and draw in the whiskers.
 - f. Outline the ears with the black marker and draw on some eyebrows.

7. Glue the body of your lion to the head and you are all finished. Do you think this is Mufasa? Simbas Dad??
