

Rafiki Mask -Felt

“Marked”

What you'll need to make a Rafiki mask:

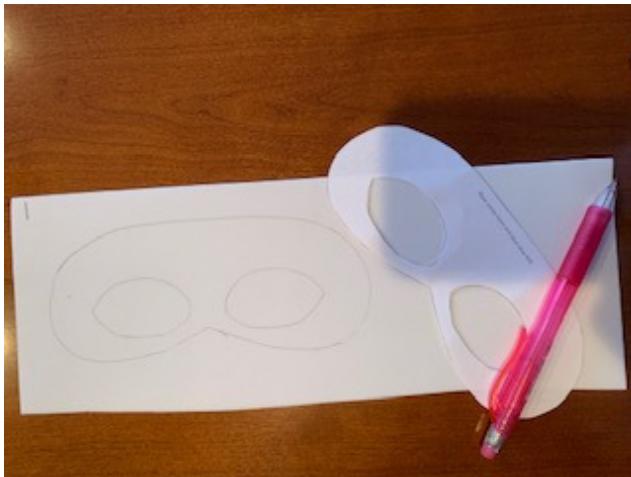

- Gray and white craft foam
- Yellow, dark blue, medium blue, light blue, and red felt
- White fur
- Black marker
- Tacky glue
- Scissors
- Straight pins
- Yarn

Instructions to make a Rafiki mask with felt:

1. Download and print the Rafiki mask template. Cut out template pieces

2. Trace the mask body onto white foam, then do the same for the eyebrows. Next, trace the hair tuft onto the gray foam

3. Cut out all of the foam pieces

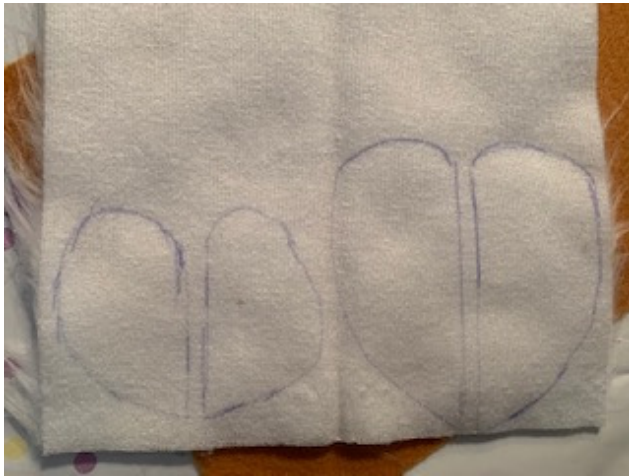

4. Next, pin the felt template pieces onto the corresponding color felt and then carefully cut out each piece. Pinning and cutting felt is not easy, ask for an adult to help you if you need it. **You can try to trace the templates onto the felt, it is difficult with the dark colors but the lighter colors work well if you use a ball point pen and you won't need to use the pins.

5. . After you have pinned or traced the templates, carefully cut out each piece.

6. Turn the fur over and trace the “hair” templates on the back of the fur, then cut them out. Make sure that the fur is facing up and down on the other side.

7. Let's put Rafiki together. Glue the dark blue mask piece over the white foam mask piece. You need to use a lot of glue when gluing together felt.

8. Glue the yellow eyes on the mask, remember to use a lot of glue

9. Next, glue the light blue pieces onto the medium blue pieces.

10. Glue on the face pieces by putting a little glue on the edge of the mask then place the face pieces on. Cover the eyes slightly.

11. Glue the fur to each side of the mask

12. Glue the top white fur pieces to the mask. Put glue on the top of the mask and then add the white fur pieces.

13. Glue on the gray foam hair tuff to the top of the mask.

14. Now glue on the nose, put a lot of glue on each side of the blue cheeks then place the nose on. Don't glue the top of the nose just yet. Draw on two nostrils.

15. Glue the eyebrows on by adding glue to the back of the eyebrows. Lift up the top of the nose and place it over the end of the eyebrow piece. Now you can glue the top of the nose down.

16. Use your holes punch and punch two holes for the ties. One on each side of the mask. Cut two pieces of yarn and tie one to each side of the mask.

It's time to put on your mask!
